Hi Commander,

I wanted to invite you to an ALPR summit we will be hosting on Tuesday, February 16th, through Tempe Police Department. In addition to discussions about Vigilant, we also get into current political and legislative topics as well as best practices. We'd love to see you guys there. There is a link to RSVP site on the flyer. Thanks!

We also executed a contract with a company called MV Trac who is also in the Repo industry who collects commercial data. We now have access to that data as well with around 18 million reads in the Phoenix Mesa, Scottsdale, Chandler area. They have close to 800 million nationally.

Thank you,

Commander,

For sure a minimum of \$22,500 for the next year for unlimited access for all sworn. If you decide to feed all your 3M PIPS mobiles into Learn, there is a \$125.00 hosting fee per mobile system starting year two. This also gets you all software updates.

Commander,

The pricing would be the same that we offered to Scottsdale \$22,500. See below. Option 3 is the option that will give you unlimited access to the private data for all sworn in your department and covers the migration of your data to LEARN. If you want to do it by user, it would be \$3,000 per user with a minimum the first year of 10 users.

are doing for Mesa PD. The Scottsdale model is a better option for you with 15 months of unlimited access to all Chandler PD sworn. I am more than happy to discuss this with you in detail and answer any questions.

Thank you,

Option 1.

Pay \$995 for an annual LEARN subscription. This gives you a LEARN account and access to the analytics but only access to the NVLS shared Law Enforcement (LE) data and LE data you directly share with other agencies.

Option 2.

Pay \$9,500 for an annual LEARN subscription. This gives you a LEARN account and access to the analytics but only access to the NVLS shared Law Enforcement (LE) data **ONLY** (no private data) and LE data you directly share with other agencies. It also includes the migration of your historical data over to LEARN and to set up the utility to ingest your current detections/reads into LEARN near real time. This price includes the first year cost of the mobile system hosting fees and is a 15 month subscription.

Option 3. (private data access)

Pay \$22,500 annual LEARN subscription and get unlimited access to LEARN, all analytics and private data. This includes an additional 3 months for a 15 month subscription. It also includes the migration of your historical data over to LEARN and to set up the utility to ingest your current detections/reads into LEARN near real time. This price also includes the cost of the mobile system hosting fees for each of your current systems for the first 15 months.

Subject: Vigilant Solutions LPR quote for mobiles and private data access

Commander Upshaw,

I want to thank you again for taking the time to meet with Greg and me this past Monday. I was able to speak to my management last night to review pricing options for you. In summary, the attached quote provides you with:

A LEARN one year subscription with unlimited access to the "private data" and analytics for all sworn in your agency
Two LPR 3 camera mobile systems with installation and all services
Includes all hosting fees for two years
Includes Mobile Hit Hunter and Mobile Companion (LEARN from a mobile phone or tablet) for two years
Unlimited access to Facial Recognition with access to our library of over 13 million images (first year)
Includes all services to migrate a copy of all your historical data from BOSS into LEARN
Includes the services and utility to ingest all your current detections/reads from your existing 3M/PIPS mobiles into LEARN

After year one, if you see the value of the private data and want to continue with a subscription, the 2nd year cost will be \$22,500 to continue unlimited use of the private data. Our standard MSPR pricing for private data based on the number of sworn in your agency is \$47,995.

Please let me know if you have any questions or comments. We had some very good discussions during our visits in AZ. Scottsdale doesn't want equipment, only access to private data so I am providing them similar pricing but without equipment. Christopher with Mesa said he was surprised his agency didn't move forward on our previous quote. I am working out some options with him that we

discussed in our meeting. He is also getting meetings set up for me with DPS and the Auto Theft Association to try and solicit their support on a more statewide LPR approach. He felt it would be good for each agency to get on board now and then work on pulling in others as they see the success and results of the program. We also met with Glendale PD to provide them some refresher training. They bought a LEARN subscription last year for \$25K. Yesterday, they sent us the contract to sign to renew for another year. During our training with them and the US Marshalls, a few comments were made that they are excited to renew as they said they can't live without it. They obviously can but it was nice to hear they are having good success.

I look forward to your feedback and am happy to address any questions or concerns. Thank you again for your time and consideration.

Commander Upshaw,

I'm just checking in to see if you had a chance to evaluate our quote any more? Any update would be truly appreciated. I look forward to discussing this with you further. DPS Auto Theft Task Force just sent us a PO through SHI for a Learn Data Subscription. This may be a way to get them more engaged and ultimately pull in their Elsas data. Scottsdale is currently identifying what funding they have. Glendale PD just sent us their signed Learn Data Subscription renewal.

Thank you,

Absolutely. That is what I suggest. In the pricing offered, the services to set that up is included. It doesn't make sense not to use the PIPS gear for as long as it is in good working order. We will take a copy of all your historical data from BOSS and import it into LEARN and set up a utility to pull all your daily reads that come into BOSS from your pips systems. We don't affect any of the PIPS systems or BOSS for that matter. We are doing it with many customers today with no issues.

Subject: Vigilant Solutions LPR quote for mobiles and private data access

Commander Upshaw,

I want to thank you again for taking the time to meet with Greg and me this past Monday. I was able to speak to my management last night to review pricing options for you. In summary, the attached quote provides you with:

A LEARN one year subscription with unlimited access to the "private data" and analytics for all sworn in your agency
Two LPR 3 camera mobile systems with installation and all services
Includes all hosting fees for two years
Includes Mobile Hit Hunter and Mobile Companion (LEARN from a mobile phone or tablet) for two years
Unlimited access to Facial Recognition with access to our library of over 13 million images (first year)
Includes all services to migrate a copy of all your historical data from BOSS into LEARN
Includes the services and utility to ingest all your current detections/reads from your existing 3M/PIPS mobiles into LEARN

After year one, if you see the value of the private data and want to continue with a subscription, the 2nd year cost will be \$22,500 to continue unlimited use of the private data. Our standard MSPR pricing for private data based on the number of sworn in your agency is \$47,995.

Please let me know if you have any questions or comments. We had some very good discussions during our visits in AZ. Scottsdale doesn't want equipment, only access to private data so I am providing them similar pricing but without equipment. Christopher with Mesa said he was surprised his agency didn't move forward on our previous quote. I am working out some options with him that we discussed in our meeting. He is also getting meetings set up for me with DPS and the Auto Theft Association to try and solicit their support on a more statewide LPR approach. He felt it would be good for each agency to get on board now and then work on pulling in others as they see the success and results of the program. We also met with Glendale PD to provide them some refresher training. They bought a LEARN subscription last year for \$25K. Yesterday, they sent us the contract to sign to renew for another year. During our training with them and the US Marshalls, a few comments were made that they are excited to renew as they said they can't live without it. They obviously can but it was nice to hear they are having good success.

I look forward to your feedback and am happy to address any questions or concerns. Thank you again for your time and consideration.

Commander Upshaw,

I am with Vigilant Solutions. I was hoping you are open to meet the week of March 9th to readdress the possibility of working with Vigilant to gain access to our NVLS private data through a LEARN subscription and work out a plan to share data with the rest of the EVIC agencies. I did participate in a few of the meetings last year when EVIC collectively was evaluating their options with several different LPR vendors. We were told everyone sees the value of accessing the private data (3 billion reads) and our analytics but felt our pricing may be too high.

I realize each agency has different requirements but all collectively want to share data with each other and would like the ability to access the private data if it is cost effective. We can do that easily with having a hosted solution. I am in a position where I want to readdress the pricing and see what we can do to fit into your budget. I am confident we can reach a price point that is a win/win for everyone. I truly would appreciate the opportunity to discuss this with you if there is still an interest in our products and services. I plan to reach out to the other agencies to find out their interest as well. Sgt. Chris Arvayo with Mesa PD and I are speaking tomorrow. I will be in AZ March 9th and 10th and would like to meet with each agency or everyone together if that works better.

I look forward to hearing from you.

Sincerely,

Kris Robinson

Subject: Vigilant Solutions ALPR / NVLS

Commander Upshaw,

I am with Vigilant Solutions. I was hoping you are open to meet the week of March 9th to readdress the possibility of working with Vigilant to gain access to our NVLS private data through a LEARN subscription and work out a plan to share data with the rest of the EVIC agencies. I did participate in a few of the meetings last year when EVIC collectively was evaluating their options with several different LPR vendors. We were told everyone sees the value of accessing the private data (3 billion reads) and our analytics but felt our pricing may be too high.

I realize each agency has different requirements but all collectively want to share data with each other and would like the ability to access the private data if it is cost effective. We can do that easily with having a hosted solution. I am in a position where I

want to readdress the pricing and see what we can do to fit into your budget. I am confident we can reach a price point that is a win/win for everyone. I truly would appreciate the opportunity to discuss this with you if there is still an interest in our products and services. I plan to reach out to the other agencies to find out their interest as well. Sgt. Chris Arvayo with Mesa PD and I are speaking tomorrow. I will be in AZ March 9th and 10th and would like to meet with each agency or everyone together if that works better.

I look forward to hearing from you.

Sincerely,

Kris Robinson

Hello Mark & Team,

Sorry about any delays.

1: The answer for number one question is yes, unlimited access to CarDetector mobile and MHH.

2: The answer to number two question:

We did not include the three-year warranty on the hardware. We did not have the discussion with you all on this topic, specifically how to structure it (e.g., are the cameras that are delivered in Year 3 covered for three years, or our standard one-year? Each Hardware and Software kit it is currently priced for one Year from the starting date of service.

We can address this specific matter when we meet next week, and give you the best option that fit your needs & requirements.

Thank you.

Sam,

A couple more questions in reference to the ILP Bundle.

- Item # 3 of the five components; does this include unlimited use of CarDetector MHH and Mobile Companion?
- Are all hardware components covered by warrant during the length of the three year subscription?

Subject: RE: Vigilant Solutions LEARN/ Chandler Police AZ

Hello Sergeant W. Mulliken,

Thank you for taking the time to write to us at Vigilant Solutions. FYI, we have two programs now that we have recently discontinued. Our NVLS Tier II paid subscription service and our Tier I (free) service that was discontinued on December 15, 2014. The reasons behind the change to offer a LEARN data subscription in place of NVLS is the fact there is a significant cost for us to maintain and grow the NVLS servers. Also, the accountability having the Agency Manager capabilities within LEARN to better manage agency access, user profiles, auditing, etc., that NVLS didn't provide. Tier 1 was the free search that allowed for 3 searches per day, 7 per week and 15 per month. NVLS Tier 2 was a paid subscription which was \$99 per month. Both Tier 1 and 2 only gave very limited information and not all the capabilities and analytics that a LEARN data subscription or Intelligent Led Policing bundle (ILP) provides. Shown below are some of the additional features you gain when accessing the private data through LEARN:

Option one (1) is to pay the annual charge for the creation of the account, ability for agency to set up an unlimited number of users, set up auditing, create and manage alerts, and use Vigilants analytics with no private data only law enforcement contributions your annual cost will be \$995.00.

The Second (2) option will gives you full access to LEARN with private Data and all the things lists below. We price the LDS service based on the number of sworn. Ability for agency to set up an unlimited number of users, set up auditing, create and manage alerts, and use Vigilants analytics Data Subscription (LDS) with unlimited Private data your agency fall(s) under the Tier level 3 at \$47,995.00 per year.

Option three (3) is our new Intelligent Led Policing (ILP) bundle that includes unlimited users and unlimited access to private data, LEARN and all our analytics, unlimited use of our mobile Learn companion, facial recognition and two (2) two mobile LPR systems or (4) fixed LPR cameras all at one annual price. Again, the pricing is based on the

number of sworn. Your pricing at Tier 3 is \$62,390.00, annually and you get new cameras included in the price each year. Note: Installation, camera mounting bracket, startup and commissioning and extended warranty are not included.

Let me know if you have any question and which option will match your needs, I will email you official quotation.

Lindsay,

I spoke to someone at NATIA this year about a quote and then was a number of agencies were going in together and buying a package, mine included. The last I heard that deal has fallen apart so I am back to where I started 6 months ago. I am interested in getting a quote on a package for 10 users. I don't need it for my entire department just my unit. Is it possible to do that?

Hi Bill,

Thank you very much for your email. We are absolutely committed to supporting you and the East Valley Chiefs with your ALPR program and requirements, and know we can provide a common system that will seamlessly facilitate data sharing across the agencies. We are very excited with the positive feedback we have been receiving from other agencies utilizing our extensive LPR data bases and analytic tools and look forward to meeting with you and your team.

My understanding is you are working with Sam on scheduling a meeting for July 10th. Kris Robinson – our new West Coast Sales Director – and Neil Schlisserman, our VP of Sales, are both planning to attend this meeting with Sam. Vigilant will be very interested in providing a proposal that will cover all the agencies, and I have instructed my team to do so. If there is ever anything that does not meet your needs or you have any comments or concerns please do not hesitate to reach out to me. We will not let you down – we invest heavily in customer relationships.

Thank you for your time and consideration in our products and solutions.

Warm Regards,

Shawn

Subject: LRP Evaluations for the East Valley Law Enforcement Agencies

Shawn,

I have been asked by the East Valley Chiefs to review several LPR systems. The object is to see if we can leverage a common system and/or the data across agencies. In addition, the chiefs want to look at how the East Valley Gang and Criminal Information Fusion Center could be used to benefit the LPR program.

Tempe PD has an excellent program underway with Vigilant and I know Scottsdale PD is also looking at the Vigilant Solution as well. In addition, other east valley agencies are looking at upgrading their current systems. In discussions, with all the agencies, there is an interest in setting the stage for coordinating information.

Shawn, is there an interest from Vigilant to look at a proposal to cover all the agencies? We can look at several options if there is an interest. The current East Valley PD's are Tempe, Chandler, Mesa, Scottsdale, Gilbert, Apache Junction, and Salt River.

Please let me know.

Thank you,
Bill Kalaf

Dear Executive Director Bill Kalaf,

Thank you for your interest in Vigilant Solutions.

Vigilant Solutions is a world leading provider of law enforcement intelligence solutions based on the LEARN Intelligence Platform, including LPR, Public Records, Facial Recognition and more.

I have attached Vigilant Solutions proposal that was prepared based on our last meeting with you at the East Valley Fusion Center in Mesa Arizona.

We look forward to meeting with you all on August 13, 2014 at 2 PM and learning how we can be of value to East Valley Fusion Center Agencies.

Thanks,

Sam Sawda, SW Regional Sales Manager

*Protecting Officers, Families
and Communities*

April 2013

Vigilant is having a very exciting 2013 so far with many new features, new faces, new customers, and new challenges as you'll see in this edition of our newsletter. In the midst of all of this change, one thing remains constant - Vigilant's commitment to its customers to provide intelligent tools to help law enforcement protect officers, families and communities.

[True Story Videos](#)

Maryland State Police Child Recovery Unit Wins \$500 for Charity!

The Maryland State Police Child Recovery Unit is our first winner for its success story of a 15-year old abducted girl being located and rescued from her abductor using LPR data from Vigilant (story below). As a thank you for their fine police work, Vigilant gladly made a \$500 donation to the National Law Enforcement Officers Memorial Fund on their behalf.

Want to know how you can be the next winner? [Read about it here.](#)

LPR Case File: 15 Year-old Girl Returned Safely Home From Abduction

A 15 year old girl was abducted in New York and taken to a hotel in Maryland where she was held as a sex slave until Maryland State Police Child Recovery Unit was able to locate her, return her home to her family, and take her abductor into custody. How did they find her? - using private sector, commercial LPR data harvested by Vigilant and shared with law enforcement via Vigilant's national law enforcement data center. Read the full story at: [http://wp.me/p2A9NQ-vM.](http://wp.me/p2A9NQ-vM)

Legislative Efforts Target LPR Technology

In 2012, Vigilant partnered with its law enforcement partners in California to defeat a Bill attempting to severely limit the use of LPR technology and the retention of historical LPR data. The message came through loud and clear that a Bill limiting the use of LPR technology and LPR data would result in lives lost and officers being put in harm's way.

Similar Bills are being sponsored across the country (Arkansas, Vermont, Minnesota, South Carolina, and others) that would prohibit Vigilant from harvesting commercial LPR data and sharing to law enforcement, and/or would limit the retention of historical LPR data down to as little as 7 days. Rest assured that Vigilant is making every reasonable effort to insure that LPR and LPR data continues to remain available as a tool for law enforcement.

Your voice is the strongest weapon against these bills, and it is important for you to help us stand against these efforts. How? - submit a story to help us tell the story of what LPR does for law enforcement and society. You could also win \$500 for a law enforcement charity. Below are two recent examples.

What You Need to Know - Privacy and Data Retention

As referenced in the above legislative story, there are many proposed bills that seek to limit retention of historical LPR data. Why? Because certain private interest groups are claiming that LPR data collection is an invasion of privacy. These interest groups are rallying lawmakers to impose retention policies that would significantly reduce the investigative value of LPR and also hinder your abilities to solve crimes like those above.

Vigilant understands these concerns and has implemented safeguards against improper use of LPR data, limiting access only to credentialed law enforcement and also incorporating full agency audit controls, input of case numbers and other information to define permissible use. That said, Vigilant supports the responsible and managed use of LPR, but adamantly opposes efforts to restrict its use. Restricting LPR use and availability will ultimately result in lives lost and the needless endangerment of officers. On the topic of privacy, Vigilant stands behind these tenets, all based in fact:

- LPR does nothing more than what law enforcement has been doing since the advent of the license plate. In days prior to the technology, an officer would write down a license plate or call a plate in by radio. LPR effectively does the same thing BUT 1) it does not discriminate or profile, 2) it allows the officer to focus on driving, and 3) it increases an officer's efficiency at this task by more than 8X.
- The license plate is the property of the state, and the ability to drive is not a right, but a privilege. It is mandated by law in every state that the license plate must be clearly visible on the exterior of the car. Further, it is well established in the Courts that there is no reasonable expectation of privacy for drivers travelling on an open roadway and that LPR does not constitute an unlawful search. (U.S. vs Wilcox, 2011; Katz v. United States, 389 U.S. 347, 1967; United States v. Knotts, 460 U.S. 276 at 281, 1983;).
- LPR data in itself contains no personally identifiable information (PII) and cannot be linked to an individual without an investigator (with permissible purpose) taking an additional step to build this link.

So, what is the right answer for LPR data retention? The short answer - there is not one. Data retention periods vary all over the world from instant deletion to indefinite retention. A rough average would probably be in the ballpark of 12-18 months, however this is only due to pressures on the above issues as most agencies would like to see retention periods much longer. There is a movement within several stakeholder groups to call for a written recommendation of 5-7 years for Part 1, or Major Crimes Investigations. With statutes of limitations for these major crimes ranging in the years, it would simply be irresponsible to delete data (or legislate the deletion of data) that may otherwise help to locate a violent criminal, terrorist, or serial offender...or rescue an abducted child.

LPR Case File:

Data Helps Solve Identity Theft from Veterans

Nearly fifty (50) families of ailing and deceased veterans reported identity theft to Detective Andre Sanchez of Long Beach Police Department in California. All victims had been patients at a local VA hospital and had a nurse in common. Upon hearing of the investigation, the nurse fled the state. Using Vigilant's LPR data, Detective Sanchez was able to locate her over 2,000 miles away

and have her taken into custody. Read the full story at:
<http://wp.me/p2A9NQ-zN>.

There's an App for that!

Vigilant is announcing a new and even more intuitive way to access and use LPR data. A new user interface for our LEARN enterprise LPR solution has been developed and is available to users in parallel with the original interface. We would like to get your feedback on this new interface, and is available for use by our customers using your current LEARN credentials. Remember, we're hosted, so there is no software to install, just visit learn-nvls.com/learnapps to see the new look and feel, and be sure to click the "Give Us Your Feedback" link at the bottom to let us know your thoughts.

One of the new and exciting apps that is available in the new LEARN interface is called Stakeout. Stakeout is a new way of looking at LPR data and allows you to virtually "stake out" one or more locations of interest. View "visits" to this location from your own fleet of LPR vehicles and/or from commercial LPR data harvested by Vigilant and shared with law enforcement. Stakeout's Common Plate Analysis feature is an investigative solution that can analyze multiple locations for ALPR vehicle sightings to identify persons of interest that may be involved in pattern criminal behavior or to identify a person of interest whose travel patterns are known. Log in today and give it a try!

Commander Upshaw,

Thanks for meeting with us at Coptech. You had indicated that you would like to integrate your existing PIPS units into our back office and perhaps expand your existing mobile units as well.

The integration of the PIPS data is quite simple, and we have done this now with several accounts around the country. Please let me know your timeline on this effort, and what you would like to see from us to help this along (bid spec, literature packet, meeting / demonstration, etc).

We are ready to assist, and look forward to working with you.

Thanks,

Brian Shockley

It would be very beneficial but we would still only get those agencies and vendors who subscriber to Vigilant's LEARN back office system. I do not know of any agencies at this time who use them. I will follow up with Tempe Police and see if they have made any advancements with their regional LPR sharing project. I would hate to pull the trigger and purchase the back office product from Vigilant and then have it be of no use.

Randy Robinson to: Edward.Upshaw@chandleraz.gov

12/05/2012 03:29 PM

This message is being viewed in an archive.

Commander Edward Upshaw,

Please forgive my informal introduction, ordinarily I would do this in person but I am utilizing your email that was provided to me by Brian Shockley my VP of Marketing. So in essence this is a warm intro as I believe that Brain has shared with you that I would be reaching out to you today with regards to your department wanting to learn more about Vigilant Solutions and our LPR offerings.

So, my name is Randy Robinson and I serve as the Channel Development Manager for Vigilant Solutions. Now based upon the sense of urgency that Brian shared with me we should have a discussion asap. That being said, please share with me when a good time will be to call you and address any questions and further the discussion that you and Brian had this morning.

Please let me know when a good time to chat is or what our schedule looks like as far this discussion.

Warm regards,

Randy Robinson

Follow Up: Normal Priority.

History: This message has been replied to.

Archive: This message is being viewed in an archive.

I talked with the Detective in charge of the Tempe PD project and we are years ahead of them. They have a couple of LPR cameras but their data is dumped at the end of each shift. He is in the process of purchasing a server, fixed unit and mobile units with a budget of \$200,000. They are leaning to the PIPS system like ours. If that is the case than it would be really easy for us to link servers. The issue is the remaining agencies that are using different LPR companies. Assistant Chief John Rush is overseeing the Tempe project if you want to call and chat with him. I think that a "super server" would be best if placed and monitored with ACTIC. How that would be funded and controlled is a different story.

Dear Sir/Ma'am,

I recently contacted one of your reps, Jacques Lilavois, regarding the fact that we do not have access to NCIC hotsheets. I was advised that if I send an email to this address, then the forms would be sent to me.

I have included Commander Upshaw on this email, as he asked me to take care of this. He will be the one to sign off on these forms and we will send them right back.

I thank you in advance for your help with this matter.

Dear Edward,

Thank you for registering for "Free Webinar- Facial Recognition: Art or Science?- Fri. July 29".

*We are limited to 100 attendees- if you receive a confirmation, you will be able to join this webinar. We apologize for the confusion with Thursday's webinar. If you receive notice that Friday's webinar is full- please sign up for a future webinar by visiting www.vigilantsolutions.com/webinars

New breakthroughs in facial recognition technology are making it possible for all agencies to develop leads. Roger Rodriguez, a facial recognition expert, will share tips and tricks on how to develop leads with facial recognition.

Please register for this session, or stay tuned for additional sessions to be announced.

We hope that you can join us.

Thanks,

Heather Richardson

Marketing Specialist

Subject: Webinar Tomorrow: Use Facial Recognition for Investigations

Facial Recognition for Investigations. Vigilant Solutions will teach you how to effectively use facial recognition for investigative leads.

Is this email not
displaying correctly?
[View it in your browser.](#)

Facial Recognition for Investigations

Facial Recognition is no longer just for controlled images. Vigilant's breakthrough technology makes it easy for any analyst, investigator, or detective to enhance low quality images to be used for face recognition.

Join Roger Rodriguez, 20-year veteran of NYPD, as he walks through Vigilant's facial recognition solution. Teaching you, or any law enforcement official for that matter, how to effectively use facial recognition for investigative leads.

- Workflow best practices
- Image enhancement tools
- Matching investigative leads

All,

I want to thank you all again for your time and attention this week during the LEARN Basic User training. Attached you will find the short "How To" PDF's regarding some of the most frequent questions I receive after trainings and a link to the Basic User Guide which is too large to attach here. Please remember that there are YouTube videos embedded in the software inside each area of concern. As I may have stated, I also give the same Basic LEARN class via live webinar, so if there are officers or analysts in your units that will be getting their LEARN credentials soon, you can forward them the links below for the 2 hour Basic LEARN class. Good luck and BE SAFE!!

LEARN is Vigilant Solutions' license plate recognition (LPR) intelligence platform; a hosted solution for law enforcement.

LEARN transforms disparate sets of data into actionable intelligence. Data such as Fixed LPR, Mobile LPR, as well as Vigilant's own network of private LPR data are merged together with powerful analytics and condensed into meaningful and visual intelligence.

After registering, you will receive a confirmation email containing information about joining the webinar.

To: "Edward.Upshaw@chandleraz.gov" <Edward.Upshaw@chandleraz.gov>
Date: 06/11/2016 04:16 PM
Subject: Wednesday's LEARN Presentation

Commander,

I have attached the PPT from the Command meeting on Wednesday. I have to save it as a PPT Show so that it cannot be changed (kind of like sending a PowerPoint PDF). Vigilant would not want an agency being able to change wording without their approval. As you move forward with needing to build your own PPT's, I can help you with individual graphics if the ones here cannot be copied out.

Regards,

Mark Rivera

Gentlemen,

Please find the attached PDF's that should assist you as Agency Managers. I have included How to Re-Activate a User. If a user does not log in to their account after 60 days, they are placed in an Inactive status, this is a protective layer to comply with CJIS security policy and it helps to identify those who may not need account access anymore or may not have been inactivated after retirement, suspension, termination, etc.

Bill if you have not done so already, you can email our support team to get the Commander and Danny up and running as Agency Managers at: support@vigilantsolutions.com

Kindly submitted,

Commander Upshaw,

I will be on site to your agency on June 8th at 1500 for your meeting. Additionally I can spend the following day or two giving on-site training for both Agency Managers and Users. The Basic User Training is a two hour lecture style session. You do have the option for me to conduct a hands on training; this is the same material, I just allow for 3 hours total due to logging in, password re-sets, and only being able to go as fast as the slowest person. Both lecture and hands on are highly effective. Ideally, I can do two sessions in a day 9-11 then 1 to 3. If you have shifts that would benefit from a 3PM start that is OK too. I have attached the training agenda for your review and I will also distribute electronically some "How To" guides for attendees.

If you can advise how many people need to be trained and if there is the availability to use an overhead projector and a Wi-Fi connection (if needed)? This will help me to be fully prepared for your training.

Commander,

I was able to pull in Mark Rivera to meet with you guys on June 8th at 1500 for 1 hour. I will leave both of your contact information below. Would it be possible to arrange training for the analysts, detectives, and other interested users at this time as well? I would like to make the best use of his time. Mark is our CJIS specialist, top trainers, and retired law enforcement.

Typically we have two training sessions, one for system administrators and one for users. Please let us know the scope of what you would like him to go over in the initial supervisor meeting, and if we can arrange the other two sessions in the same day, that would be great as well. He's a great resource.

Greetings Mr. Mills

Below are the questions I was initially asking. I believe those were from the ESA and not the software service agreement. I had to have these agreements converted over to Word documents but unfortunately my assistant has been out all week and I was swamped today so I have been unable to sort out which one we are doing. So that said, please clarify which agreement by sending the correct one in a Word document if possible. Please include answers to these questions and the correct price sheet and information. I should be able to get this back to you tomorrow. See following questions.

A few questions and requests. Page 1 under definitions states Effective Date 60 days subsequent to date set forth in first paragraph so is there a reason start date is 60 days prior? On page 5 can you tell me what package is being selected? With that can you tell me the overall cost of this service? Want to make sure it is under threshold allowing for Dept Head signature? Additionally on page 7, paragraph D the choice of law has to be the State of Arizona and not California. . . We do not agree to have another jurisdictions laws interpret the agreement, etc. We are not familiar with California laws and therefore do not allow for them to control. Page 8 I need the contact person and information for Affiliate? Is it Chief info or yours or Bills? Same thing for Pages 9 and 10.

Thank you for your assistance.

HI Greg, We are not purchasing equipment at this time, Just the subscription. Which agreement should legal be looking at this one or the one in my previous email? I remember one of the issues was a statement regarding what state would hear a legal redress if we had one? (Texas , Arizona, or California). FYI- Our Legal advisor says she will get me a redlined copy of the earlier one to me tomorrow..

Commander,

We are good to go. Our subscriptions run on an annual basis. We gave you an extra three months of service for free as a way of saying thank you for coming on board. After that first 15 months, your 12 month subscription fee is \$22,500 and \$125 per 3M vehicle. There are also bundling options you can look into at every renewal that provide a very large discount on hardware for the years that you are looking to put more cameras out there.

Does that answer your questions? Thanks!

Greg, Are we ok to use criteria in quote KRO-0048-01. The grant was administered with that quote in mind yet the language in the enterprise agreement looks like the cost are open ended and not fixed for 15 months.. Can you clarify for me?

Greetings Mr. Mills

Below are the questions I was initially asking. I believe those were from the ESA and not the software service agreement. I had to have these agreements converted over to Word documents but unfortunately my assistant has been out all week and I was swamped today so I have been unable to sort out which one we are doing. So that said, please clarify which agreement by sending the correct one in a Word document if possible. Please include answers to these questions and the correct price sheet and information. I should be able to get this back to you tomorrow. See following questions.

A few questions and requests. Page 1 under definitions states Effective Date 60 days subsequent to date set forth in first paragraph so is there a reason start date is 60 days prior? On page 5 can you tell me what package is being selected? With that can you tell me the overall cost of this service? Want to make sure it is under threshold allowing for Dept Head signature? Additionally on page 7, paragraph D the choice of law has to be the State of Arizona and not California. . . We do not agree to have another jurisdictions laws interpret the agreement, etc. We are not familiar with California laws and therefore do not allow for them to control. Page 8 I need the contact person and information for Affiliate? Is it Chief info or yours or Bills? Same thing for Pages 9 and 10.

Thank you for your assistance.

Regards,

Brian,

Thanks to you and your team for the forums yesterday in Tempe. The facial recognition was better than I expected...I seeing it as more as a policing tools (what we do) rather than another data base. We may want to consider doing a regional annual LPR update...

When you get a minute please send me case law ("the boring slides"...☺) from your presentation.

Thanks again.
